

LOGISTICS READINESS IMPACT (LRI)

The Lockwood Group's LRI solution drives down your O&S costs while improving your Readiness.

BUSINESS CHALLENGE

The Department of Defense continues to face significant challenges. There are regular uncertainties about the budget. The resources needed to execute projects are not always funded. The long-term impact has been greater with logistics, product support and sustainment not being properly planned. This is resulting in increasing Operating and Support costs and our Readiness rates falling behind our adversaries. For our nation the DOD must address these issues immediately.

The Lockwood Group developed the **Logistics Readiness Impact (LRI) solution** to properly plan logistics from an enterprise viewpoint and deliver consultation across all 12 product support elements to improve Readiness while drive down life cycle costs.

THE LOCKWOOD GROUP'S LOGISTICS READINESS IMPACT SOLUTION

For decades, The Lockwood Group's Integrated Logistics experts have been using the **LRI solution** to help Product Support Managers improve readiness and drive down life cycle costs.

Phase 1 – Logistics Requirements Analysis

During this phase TLG will conduct an enterprise analysis on your program to identify the challenges in helping you forecast where you will need support in the future. TLG's logistics experts have experience executing ILS programs for OEMs, in POR development and as PSMs, with unique background to conduct a true enterprise analysis. Based on complexity of your system this could require several of our logistics experts to assess.

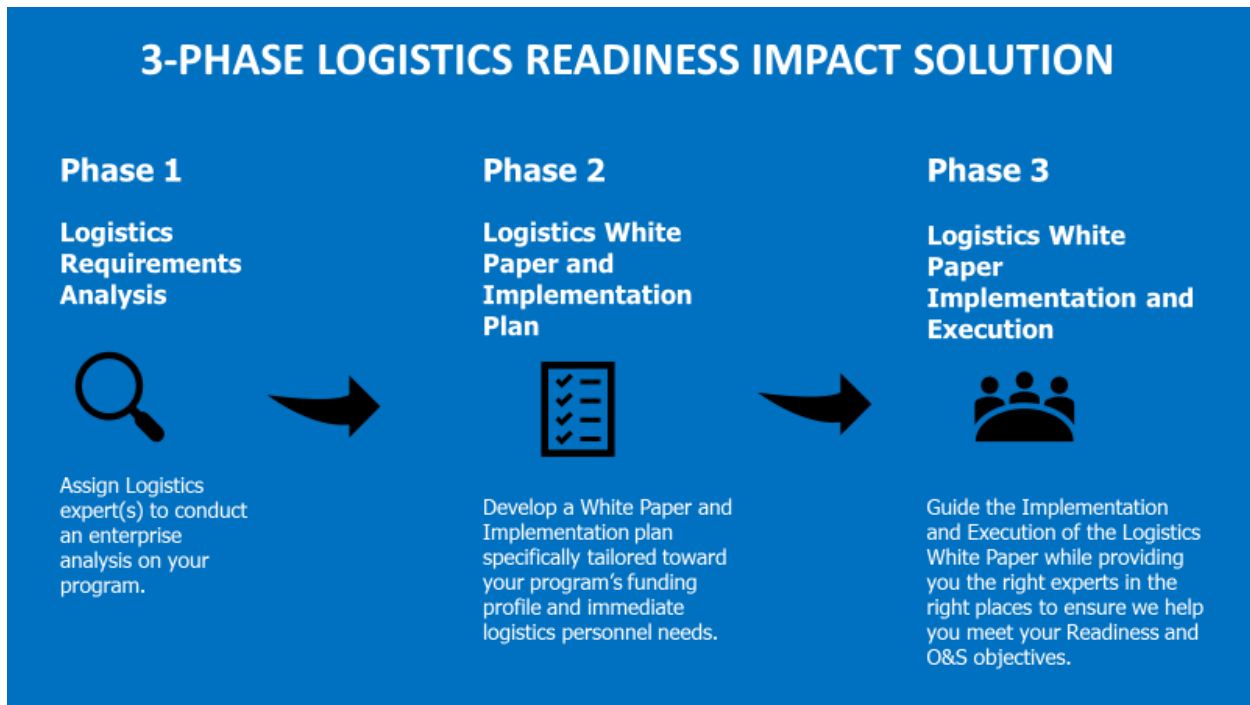

Phase 2 – Logistics White Paper and Implementation Plan

Leveraging decades of Logistics expertise across all 12 product support elements, TLG develops a White Paper and Implementation Plan addressing the weak areas in your program's logistics enterprise planning. TLG then tailors an Implementation Plan based on your funding, resourcing and Readiness requirements.

Phase 3 – Logistics White Paper Implementation and Execution

During Phase 3 TLG helps guide the implementation and execution of the Logistics White Paper. Ensuring success in implementation TLG provides logistics expertise to help put the logistics program to work. Further we will provide you the right experts in the right places to implement supporting your Readiness objectives and helping you to lower your O&S costs.

The LRI solution helps you improve Readiness and drive down O&S costs!

THE LOCKWOOD GROUP ADVANTAGE

- Enterprise look into the health of your logistics program from the OEM, POR and Product Support viewpoint.
- Expertise delivered from a cadre of integrated logistics experts across all 12 Product Support elements.
- Tailored Implementation Plan designed around the DOD acquisition process, funding streams and approval cycles to ensure your system is fielded, transitioned and sustained.
- Agile program funding profile ensuring you can execute the Implementation Plan.
- Access to logistics critical thinkers to help you design a Life-Cycle Sustainment Plan that remains current and ensures Readiness.

KEY BENEFITS OF LRI SOLUTION

- Tailored solution funded and resourced based on your specific program's funding profile.
- Resources placed where they are most needed.
- Enterprise approach across all 12-product support elements offered by proven Logistics subject matter experts.
- An On-Call critical thinking solution to reach out to whenever you have a question.
- Ability to ramp up and staff across all key elements of Product Support as needed and funded.
- Experience with SETA and OEM product support with a unique perspective to identify Readiness and life cycle costs issues from both sides.

Problem Solvers

The Lockwood approach is focused on solving our customers' challenges through innovation and carefully designed solutions. Our integrated solutions combine service-with-solution to provide the impact to increase performance, lower costs, save time, improve safety and enhance our customer's Mission Readiness.
